SUBJECT INDEX TO VOLUME 9

A

Adrenocortical function, effect of undernutrition in rats, 109
Alfalfa,
  effect on cholesterol metabolism of rats, 301
  evaluation as a protein source for rabbits, 267
Amino acid(s), (see also specific amino acid)
Ammonia, effect of sodium glutamate on production during physical exercise in man, 223
Argentina, protein requirements of undernourished infants, 433

B

Behavior, effect of maternal dietary protein level on progeny, 31
Biuret, utilization of nitrogen by ponies, 209
Brazil, enrichment of food staples,effect on palatability in man, 85
Bread, effect of millet supplementation, nutritional and technological studies in rats, 59,69

C

Cadmium,
  acceptability by lambs, 273
  toxicity, effect of iron in rats, 407
Calcium metabolism, influence of dietary phosphate in chicks, 183
Candicidin, hypocholesterolemic effect in cockerels, 245
Carbohydrate,
  dietary, effect on rerepression of rat liver enzymes, 91
  effect on physical endurance in man, 377
  metabolism, effect of pyridoxine deficiency in rats, 97
Casein, effect of dietary level on fatty acids in rats, 21
Cellulose, effect on cholesterol metabolism of rats, 301
Chickens, metabolism of mimosine from leucaena leucocephala, 217
Chicks, role of phosphate in blood calcium metabolism, 183
Cholesterol,
  dietary, effect on lipid metabolism of rats, 125
  in plasma of cockerels, effect of candicidin, 245
  metabolism, effect of nonnutritive fiber in rats, 301
  and salt mixture, effect on serum and liver zinc, vitamin A and cholesterol levels in rats, 319
Cockerels, effect of candicidin on plasma cholesterol levels, 245
Corn,
  as a source of phosphorus for quail, 79
  effect of whey supplements on nutritive value, 241

Corn and cassava meals, effect of protein supplementation in Brazilian students, 85
Coronary heart disease, epidemiology in man, 393
Cottonseed oil, oxidized, biochemical effects in swine, 359

D

Dairy animals, association of plasma viatmin A levels and packed cell volume, 401
DDT, effect on growth, liver lipids and vitamin A storage in rats, 1
Diphtheria-tetanus toxoid, response in human PCM, 427

E

Egg, production and weight, effect of sucrose in hens, 9
Enzyme(s), (see also specific enzymes)
liver, effect of dietary fat and carbohydrates in rats, 15, 91
Equine, utilization of nitrogen from soybean meal, biuret and urea, 209

F

Fat,
dietary association with Zn:Cu in 71 foods; coronary heart disease implications in man, 393
_____, effect on rerepression of rat liver enzymes, 15,91
Fatty acids, effect of casein levels in rats, 21
Fish protein concentrate, influence of water fractionation on nutritive value in rats, 309
Flavinoids, effect on thyroid activity in rats, 179
Food mixtures, based on wheat and supplemented with protein, nutritive evaluation studies, 169
Food restriction, effect on adrenocortical function in rats, 109

G

Gelatin, effect of tryptophan supplementation in humans, 277
Glucose, 6-phosphate dehydrogenase, effect of dietary fat and carbohydrate on rerepression in rats, 15,91
Grain source, effect on turkey reproduction, 259
Growth, effect of maternal dietary protein level on progeny, 31
Guinea pigs, vitamin A-deficient, effect on inner ear histology, 383

H

Hens,
breeder, effect of nutrient restriction on sexual maturity, 149
laying, effect of sucrose on feed intake, egg production and egg weight, 9

I

Iron,
effect on cadmium toxicity in rats, 407
_____ of dietary protein level on maternal and fetal stores, 47
_____ on protein synthesis in rats, 415

L

Lambs, acceptability of cadmium in feed and water, 273
Lipid(s),
liver, effect of methionine and DDT in rats, 1
metabolism, effect of dietary methionine and cholesterol in rats, 125
_____, _____ peanut oil in rats, 343
_____, _____ millet protein in rats, 441

M

Malic enzyme, effect of dietary fat and carbohydrate on rerepression in rats, 15, 91
Malnutrition, in Argentinian infants, protein requirements, 433
Mercury toxicity, in rats, protection by selenium and zinc, 135
Methionine,
dietary, effect on lipid metabolism of rats, 125
effect on growth, liver lipids and vitamin A storage in rats, 1
nitrogen sparing action in rats on protein-free diets, 159
Mice,
effect of PCM on phagocytosis by peritoneal macrophages, 191
pregnant, effect of protein level on maternal and fetal iron stores, 47
Millet,
effect on lipogenesis in rats, 441
supplementation, of bread, nutritional and technological studies in rats, 59, 69
Mimosine, metabolism in the chicken, 217
Mineral(s), (see also specific minerals)
Mitochondria, liver, effect of casein level in rats, 21
Monosodium methanearsenate, effect of long-term feeding in rabbits, 351

N

Niacin status, biochemical assessment in man, 291
Nitrogen balance, in humans, effect of tryptophan supplementation of gelatin, 277
Nitrogen sparing effect, of methionine and threonine in rats on protein-free diets, 159
Nutrient restriction, methods, effect on sexual maturity of hens, 149

O

Oilseeds, nutritive value in rats, 453
Olive kernals, as a source of protein, 117

P

Packed blood cell volume, relation to plasma vitamin A in dairy animals, 401
Peanut oil, effect on lipid metabolism in rats, 343
Phagocytosis, by peritoneal macrophages of mice, effect of PCM, 191
Physical exercise,
  effect of carbohydrates on endurance in man, 377
  _____ sodium glutamate infusion on ammonia formation in man, 223
Phosphate, dietary, effect on blood calcium metabolism in chicks, 183
Phosphorus, utilization from corn by quail, 79
Pigs, effect of dietary vitamin E and cottonseed oil on various parameters, 359
Protein,
  dietary, effect of level in gestation and lactation on growth and behavior of progeny, 31
  _____, _____ on maternal and fetal iron stores, 47
  _____, _____ toxicity, of tansy ragwort to rats, 197
  _____ level, effect on turkey reproduction, 259
  liver, and plasma, effect of feeding retinol and retinoic acid on leucine-1-^{14}C incorporation, 233
  requirements, of undernourished infants in Argentina, 433
  supplementation, of wheat nutritional evaluation, 169
  _____, of native Brazilian food staples, effect in man, 85
  synthesis, effect of iron in rats, 415
Protein-calorie malnutrition,
  effect on phagocytosis of peritoneal macrophages of man, 191
  in man, response to diphtheria-tetanus toxoid, 427
Protein-free diets, nitrogen sparing effect of methionine and threonine in rats, 159
Pyridoxine deficiency, effect on carbohydrate metabolism in rats, 97

Q

Quail, utilization of phosphorus from corn, 79

R

Rabbits,
  effect of alfalfa protein concentrate on growth, 267
  _____ long-term feeding of monosodium methanearsenate, 351

Rats,
adult, effect of low casein diet on fatty acids, 21
_____, nitrogen sparing action of methionine and threonine, 159
effect of isocaloric, isogravic diets and nonnutritive fiber source on cholesterol metabolism 301
growing, effect of iron on cadmium toxicity, 407
_____, mercury toxicity and protection by selenium and zinc, 135
malnourished, nutritive value of corn supplemented with whey products, 241
pathogen-free, effect of dietary fat and carbohydrate on rerepression of lower enzymes, 15,91
pregnant, adrenocortical function in undernutrition, 109
_____, effect of dietary protein level in gestation and lactation periods, on growth and behavior of progeny, 31
viatmin A-deficient, effect of retinyl acetate or retinoic acid on testes and liver RNA, 27
weanling, effect of dietary protein and sulfur amino acids levels on toxicity of tansy ragwort, 197
_____, _____ methionine and cholesterol on lipid metabolism, 125
_____, _____ DDT on growth, liver lipids and vitamin A storage, 1
_____, _____ millet supplementation of wheat flour on NPU and digestibility in rats, 69
_____, _____ peanut oil on lipid metabolism in selected tissues, 343
_____, _____ pyridoxine deficiency on carbohydrate metabolism, 97
_____, _____ tricin on serum thyroxine levels, 179
_____, influence of water fractionation on nutritive values of FPC, 309
_____, nutritional value of olive kernels, 117
_____, nutritive value of oilseeds, 453
young, effect of iron on protein synthesis, 415
_____, _____ liquid and hardened soybean oils on physical and chemical parameters, 331
Retinoic acid,
effect on liver and testes RNA in rats, 27
_____ plasma and liver proteins in rats fed varying levels of dietary proteins, 233
Retinol, effect on plasma and liver proteins in rats fed varying levels of dietary proteins, 233
Ribonucleic acid, in testes and liver of rats, effect of vitamin A deficency, 27
Romania, biochemical assessment of niacin studies in man, 29

S

Salt mixture, effect on serum and liver zinc, vitamin A and cholesterol in rats, 319
Selenium, protection against mercury toxicity in rats, 135
Sexual maturity, of hens, effect of nutrient restriction, 149
Sodium glutamate, effect on ammonia formation during physical exercise in man, 223
Soybean meal, utilization of nitrogen by ponies, 209
Soybean oils, effect of processing on physical and chemical parameters in rats, 331
Sucrose, effect on feed intake, egg production and egg weight of hens, 9
Sulfur amino acids, dietary, effect of levels on toxicity of tansy ragwort in rats, 197

T

Tansy ragwort, effect of nutritional factors on toxicity in rats, 197
Tea, effect on thiamin status in man, 371
Thailand, effect of tea consumption on thiamin status in man, 371
Thiamin status, effect of tea consumption in man, 371
Threonine, nitrogen-sparing action in rats on protein-free diets, 159
Thyroxine, serum levels, effect of tricin feeding in rats, 179
Tricin, effect on serum thyroxine levels of rats, 179
Tryptophan, supplementation of gelatin, nitrogen balance effects in humans, 277
Turkey, response to diphteria-tetanus toxoid in PCM in man, 427
Turkey hens, relation of protein level and grain source on reproduction, 259

U

Urea, utilization of nitrogen by ponies, 209

V

Vitamin(s), (see also specific vitamins)
A, deficiency, effect on inner ear histology in guinea pigs, 383
__, _____, _____ testes and liver RNA in rats, 27
__, effect of methionine and DDT in rats, 1
__, in liver and serum of rats, effect of salt mixture and cholesterol, 319
___, plasma effect on packed cell volume in dairy animals, 401
___, relation to dietary protein status, 233
E, dietary biochemical effects in swine, 359

W

Wheat, effect of protein supplementation on nutritive value, 169
Whey products, as supplement to corn, nutritive values, 241

Z

Zinc,
and copper ratios in foods, relation to dietary fat in epidemiology of coronary heart disease in man, 393
in liver and serum of rats, effect of salt mixture and cholesterol, 319
protection against mercury toxicity in rats, 135

SUBJECT INDEX TO VOLUME 10

A

Adenyl cyclase, 327
Adipocyte, 9
Adipose tissue, 9, 55
Adrenal cortical function, 381
Aflatoxin, 89
Age,
  effect on birth weight in rats, 345
  effect on tissue lipid peroxidation, 339
Amino acid(s), (see all specific amino acid)
  fortification, 1, 45, 103, 121, 229, 371, 405
  metabolism, 69
Ascorbic acid, 139, 357

B

Basal metabolic rate, 133
Behavior, in rats, 19
Biological,
  availability, 261
  values, in humans, 201
  _____, __rats, 397
Biphenyl, polychlorinated, 79, 151
Birth weight, in rats, 19, 345
Body composition, 229
Broilers, 333
Brain sulphatides and cerebrosides, 173, 389

C

Cadmium toxicity, 139
Caloric restriction, 127
Canthaxanthin, 269
Carbohydrate metabolism, 45, 69, 113, 195
β-Carotene, 269
Cell, size and number, 9, 249
Cellular growth of fetus, 209
Cholesterol, 79, 113, 269, 277
Copper, dietary supplement, 235
Corn oil, levels in rat tissue lipids, 25
Corticosterone, 121
Cyclic AMP phosphodiesterase, 327

D

Diet,
  in broilers, 333
  __ maternal rats, 19
  methyl deficient, 297
  nonprotein, 371
Diphenyl derivations, 79

E

Egg protein and wheat gluten, 201
Encephalitic syndrome, with fatty degeneration of viscera, 89
Enzyme(s), (see also specific enzyme)
  activity in rats, 221, 291, 327
  glucose-6-phosphate dehydrogenase, 127, 189, 291
  induction, 189
  _____, liver, 127
  NADP linked, 291
  _____-and NAD-linked dehydrogenases, 315

F

Fat cell metabolism, 305
Fatty acids, 25, 69
Folic acid and development, 241

G

Gestation, diet related to growth, 103
Glucose, effect on amino acid metabolism, 69

Glycine, supplementation, 229, 405
Grass silage, 133

H

Hair, as biopsy material, 181
Hemicellulose, 163
Hepatic,
  lipogenesis, 113
  phospholipid synthesis, 297

I

Intestinal absorption, polychlorinated biphenyls, 151
Iodine, 133
Iron,
  dietary, 139
  metabolism, 1, 357

K

Kidney, calcification, 357

L
